Message from the Editor to our Reviewers

We are able to accept only a minority of submitted manuscripts and must make difficult decisions regarding which articles will most benefit our readers and improve patient care. Your thoughtful comments regarding experimental research investigations, the uniqueness of study populations, novel methods and techniques, studies that are especially educational, or new strategies for diagnosing and treating neurologic disease are enormously helpful and highly appreciated. Our gratitude for your dedication to reviewing for Neurology® Neuroimmunology & Neuroinflammation cannot be adequately conveyed.

For guidance in reviewing, see the Information for Reviewers (IFR) link at Neurology.org/nn. Click on this link for information on expectations of reviewers regarding confidentiality, timeliness, and reviewer conflicts of interest. The IFR also provides instructions for formatting the comments to editors and authors in order to make communication with authors most effective.

Please send an email to nnnjournal@neurology.org if you would like to do more reviews or if you have never reviewed for the journal but are interested in doing so. Please include a description of your credentials and expertise in the areas in which you are qualified to review. The reviewers listed below with 1 asterisk have reviewed 5 or more manuscripts. Two asterisks indicate that the reviewer has reviewed 10 or more manuscripts. This list includes those reviewers who returned a review or reviews of initial submissions (re-reviews of the same manuscript are not included) between November 1, 2016, and October 31, 2017.
