Clinical approach to the diagnosis of autoimmune encephalitis in the pediatric patient

Neurol Neuroimmunol Neuroinflamm 2020;7:e730. doi:10.1212/NXI.0000000000000730

In the article “Clinical approach to the diagnosis of autoimmune encephalitis in the pediatric patient” by Cellucci et al.,¹ first published online January 17, 2020, the text under the question in the top left box in figure 1 should read, “Previously healthy patient presenting with at least 2 of new focal or diffuse neurologic deficits, cognitive difficulties, movement abnormalities, psychiatric symptoms and/or seizures.” The bolded header of the box directly below it should read, “Possible pediatric AE.” The text in the 4th box down on the left should read, “Consider initiating immune therapy, if not already started.” The corrected figure 1 appears below. The authors regret the errors.
