In the Clinical/Scientific Note, “Guillain-Barré syndrome and chronic inflammatory demyelinating polyradiculoneuropathy after alemtuzumab therapy in kidney transplant recipients,” by M. van der Zwan et al.,¹ the final sentence under the “Study Design” subheading of the Methods section should read “Alemtuzumab was administered as a single dose of 30 mg subcutaneously and rATG in a dose of 4 mg/kg.” The publisher and authors regret the error.
