

Neurology Neuroimmunology & Neuroinflammation's Acknowledgment to Reviewers

Neurol Neuroimmunol Neuroinflamm 2021;8:e1002. doi:10.1212/NXI.0000000000001002

In recent years, the number of articles submitted to N2 has grown substantially. Currently, we are able to accept only a minority of submitted articles, and therefore, we must make difficult decisions regarding which articles will most benefit our readers and improve patient care. The extraordinary work of our reviewers facilitates this task. The dedication to reviewing for *Neurology*® *Neuroimmunology & Neuroinflammation* cannot be adequately conveyed. Your thoughtful comments regarding experimental research investigations, the uniqueness of study populations, novel methods and techniques, studies that are particularly educational, or new strategies for the diagnosis and treatment of neurologic diseases are enormously helpful and highly appreciated.

Please send an email to nnjournal@neurology.org if you would like to do more reviews or if you have never reviewed for the journal but are interested in doing so. Please include a description of your credentials and expertise in the areas in which you are qualified to review. The reviewers listed below with 1 asterisk have reviewed 5 or more articles. Two asterisks indicate that the reviewer has reviewed 10 or more articles. This list includes those reviewers who returned a review or reviews of initial submissions (rereviews of the same article are not included) between January 1, 2020, and December 31, 2020.
