Systemic Inflammation Is Associated With Neurologic Involvement in Pediatric Inflammatory Multisystem Syndrome Associated With SARS-CoV-2

Neurol Neuroimmunol Neuroinflamm 2021;8:e1023. doi:10.1212/NXI.0000000000001023

In the article “Systemic Inflammation Is Associated With Neurologic Involvement in Pediatric Inflammatory Multisystem Syndrome Associated With SARS-CoV-2” by Sa et al.,¹ the first sentence under Results in the Abstract should read, “75 patients with PIMS-TS were identified, 9 (12%) had neurologic involvement: altered consciousness (3), behavioral changes (3), focal neurology deficits (2), persistent headaches (2), hallucinations (2), excessive sleepiness (1), and new-onset focal seizures (1).” The authors regret the error.
